

STILL SMALL VOICE
w/m D. Cooper Getschal & Lyndie W. Wenner

There's a place in every heart
Where all things end and all things begin
All life's questions will be answered
When you let the silence in

Listen to that still small voice it'll save you
Listen to that still small voice it'll save you
Refusing what's inside Is like taking the breath out of life
Listen to that still small voice it'll save you

I'll teach you and you can teach me
Together we can make a better world
Where everybody's laughing in the sunshine
Dancing to the same time in peace and harmony

Listen to that still small voice it'll save you
Listen to that still small voice it'll save you
Refusing what's inside Is like taking the breath out of life
Listen to that still small voice it'll save you

So just stop you're crazy world from turning
It's time we all start learning
So just stop you're crazy world from turning
It's time we all start learning
Learning how to live, together

Listen to that still small voice it'll save you
Listen to that still small voice it'll save you
Refusing what's inside Is like taking the breath out of life
Listen to that still small voice it'll save you

Listen, Listen to that still small voice
Listen, Listen to that still small voice
Refusing what's inside Is like taking the breath out of life
Listen to that still small voice it'll save you
Listen to that still small voice it'll save you
Save you, gonna save you, save you
